

Press Release

Wise Trip Management Enhances Operational Efficiency with AIR SUPPORT's PPS Flight Planning

Florida, US – May 2025 – Wise Trip Management, a leading trip planning provider (flight service provider) in the U.S., has significantly improved its operational workflow by implementing the **PPS Flight Planning System®** from AIR SUPPORT.

"The PPS Flight Planning System has positively streamlined our flight planning process. Creating and adjusting routes is incredibly user-friendly, thanks to the intuitive interface and side-by-side map view. Plus, the 24/7 support ensures we're never left without assistance should the need arise. PPS has become an invaluable tool for our operations at Wise Trip Management."

— PJ Sharpe, VP of Business Development, Wise Trip Management

The PPS Flight Planning Software is designed to support dispatchers and flight operators by delivering flexibility, precision, and real-time responsiveness. Its advanced route planning tools, including graphical map assistance, reduce workload while increasing planning accuracy.

Key advantages realized by Wise Trip Management that allow flight operators to significantly reduce fuel consumption and lower CO₂ emissions, while maintaining full compliance with regulatory requirements:

- **Faster route generation and amendments**—by saving time, improving fuel efficiency, and reducing the environmental impact
- **Improved situational awareness through an integrated visual interface** – Enhancing safety and compliance
- **Continuous, round-the-clock aviation expert support** from AIR SUPPORT's aviation industry specialists

Wise Trip Management's implementation of the PPS Flight Planning Software underlines the system's value for **international dispatch teams seeking reliable, user-friendly planning tools**. As AIR SUPPORT continues to grow across the Americas, partnerships like this reflect the company's ongoing commitment to improving global flight operations.

About Wise Trip Management

Wise Trip Management takes pride in its ability to tailor each trip to its clients' unique needs and preferences. The commitment to exceptional service doesn't stop at the flight, either.

They assist their clients with comprehensive flight plans that consider all relevant factors, including fuel calculations, to ensure their aircraft can safely reach its destination and comply with air traffic control requirements to minimize the risk of mid-air collisions.

About AIR SUPPORT

AIR SUPPORT is a global flight planning, crew briefing, and flight tracking software provider for airlines, aviation businesses, and government flight operators worldwide. Known for its flexibility and reliable customer support, AIR SUPPORT's mission is to deliver flight planning & operational control systems, providing fact-driven optimizations to the benefit of customers and the global environment, hence enabling customers to maintain full operational control at all times.
